

XM Satellite Radio is a major benefit to me. When I'm on the road or working in remote location (where I can't pick up any radio signals/emergency broadcasts) the variety of music/other programs and especially the traffic and weather stations provide a variety and quality not found elsewhere. I Pay for these services and it should not be up to the NATIONAL ASSOCIATION of BROADCASTERS to dictate what I am permitted to hear. I urge the FCC to REJECT the NAB'S petition 04-160 and to support XM'S ability to provide the kind of programming that I demand and DESERVE.
